

888 PRO OZONE GENERATOR

Compact professional solution for disinfection by oxidation of surfaces such as indoor air as well as effective odour neutralization

•••

Ozone output

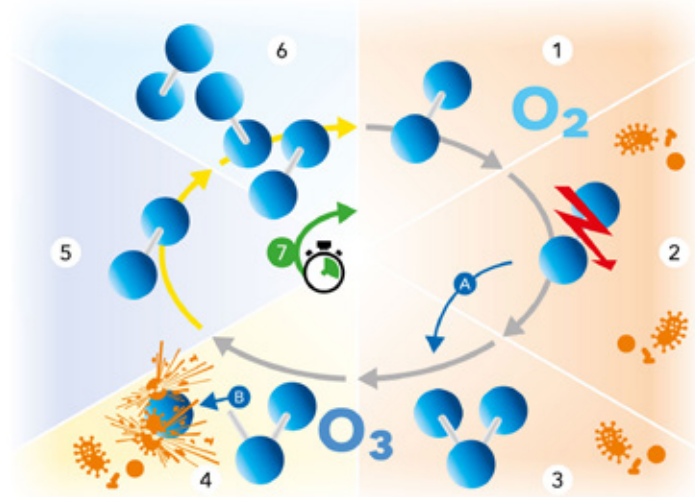

**7,000
mg/h**

Sound level
<65 dB

KEY DESIGN FEATURES

- Disinfection and sterilization, without secondary pollution. Eliminate odor, mildew.
- Strong ozone generation: the maximum ozone output is 7000 mg / h, and the medium and high frequency, high voltage eddy current technology and small output voltage are adopted. This kind of ozone generator has a strong ozone generation capacity. In addition to home use, it is also suitable for larger areas, such as offices, restaurants, hotels and garages.
- Easy to operate: there are only 5 buttons on the control panel and an easy to read LCD monitor.
- Limit time length: timer limit time length ≤ 2H. (After the ozone machine works continuously for 2 hours and decomposed for 1 hour, people and pets can enter).
- 12 h / 24 h cycle mode: the machine can be set to automatically start working at the same time every day or half a day.
- Soft magnetic stickers for mosquito prevention are attached.

WHAT IS OZONE?

Ozone is one of nature's most powerful antioxidants. Ozone exists in the atmosphere to protect human beings from the sunlight. That fresh, clean smell after a thunderstorm? That's ozone too.

PRODUCT DESCRIPTION

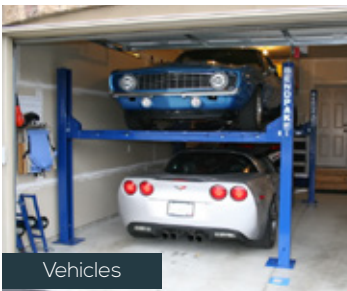

With a max ozone output of 7,000 mg per hour, works great to remove any unpleasant smells like smoke odor, cooking odor, car odor, paint, or anything else for Powerfully Clean Results. Low maintenance and a portable design In addition to regular home use, this also makes the 888 Pro perfect for larger areas like offices, warehouses, boats, cars, garages, and just about any space, large or small. Areas are sterilized and deodorized in less time. Note: ONLY USE IN UNOCCUPIED SPACE.

APPLICATION

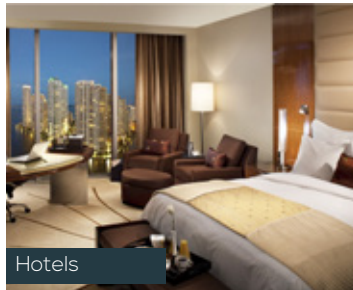

- Rooms in the house
- Smoking Areas
- Vehicles
- Hotels
- Garages & basements
- Gyms
- Restaurants
- Schools & offices

WHY WE NEED AN OZONE GENERATOR?

The 888 Pro ozone generator can remove tough odors in the air, such as musty basement Odors, flood and fire Odors, cooking odors, tobacco odors, mildew odors, paint odors. To reduce the risk of illness, it's important that you remove unpleasant odors to protect you and your family.

HOW TO USE OZONE GENERATOR?

Step one - Clean up the treatment area

Before ozone treatments, please do some cleaning in order to remove the source of the odors.

Step two - Set the timer

Use the control button set the time and leave the room. Treatment time can be adjusted according to room size and air quality.

Step three - Leaving the treatment area

Make sure you and your pets stay outside the room being ozone treated.

Step four - Air out the treatment area

Air-out the treated area for a minimum of 30 minutes before allowing people or pets to re-occupy the space. Continue with loop mode if necessary.

OTHER DESIGN FEATURES

- Easy to control interface. Through the five buttons on the control panel and the easy to read LCD display, the Ozone generator can be started and operated in a few seconds.
- 12 / 24 hour cycle mode: the cycle mode function can set your ozone machine to run for 1 / 2 hour every 12 / 24 hours. This allows you to get rid of the daily setting of ozone treatment. Start the device when the room is free, and it will automatically start working at the same time every day or half a day.
- Metal shell: the metal shell may be very heavy, but the shell designed with 304-grade stainless steel has the characteristics of anti-corrosion, easy to clean, and the overall baking paint treatment has a beautiful surface.

HOW DOES OZONE HELP YOU?

Ozone can help remove tough smells and replace them with a neutral smell. Ozone (O₃) contains three atoms of oxygen instead of the O₂ you breathe. The third oxygen atom makes ozone extremely reactive and attaches itself to other molecules. When pollutants and bacterial meet ozone, oxidation occurs and both parties are destroyed, while the O₃ essentially reverts back to O₂ you can breathe. Ozone not only removes the tough odors but also kills the bacteria.

SPECIFICATIONS

Power	110V/60HZ, 1A
Air Flow	130 CFM / 220 CMH
Sound Level	< 65 dB
Ozone Output	7,000 mg/h
Applicable Area	800 sq. ft
Dimensions(L×W×H)	9.8 x 6.5 x 8.7 in
Service Life	25,000 h
Ambient Temperature Requirements	14°F ~ 95°F
Environmental Humidity Requirement	< 55%
